

Big size Flush Mounted Spider

OWS, together with partner, has deployed these large type FMS being able to run from 24" to 30" casing/conductor fully remote operated.

The dies and inserts are custom built to have as little stress on the casing/tubing as possible. Physical tests has shown that the FMS leave very little marking on the casing/tubing during high load jobs.

THE OWS FMS COMES IN FOLLOWING SIZES:

- For 49 1/2" rotary, 1000 ton capacity, slips sizes 24", 26" and 30" (custom sizes can be made)
- For 37 1/2" rotary, 1000 ton capacity, slips sizes from 2 7/8" and up to 20"
- All FMS 's are hydraulic operated and can be operated directly by the Driller
- OWS and partner, believes these tools are the best , safest, and most efficient tools built in today's market

Tubular Handling range 49-1/2" Rotary table	24" - 30" (One inch variance on dies)
Tubular Handling range 37-1/2" Rotary table	5" - 20" (One inch variance on dies)
Rated capacity	1000 ton
Custom sizes available	Upon request
Operational mode	Via Driller / Via stand alone panel
